

**INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, JANUARY 19, 2006 – 0530 MST  
NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally with 40 new fires reported. Ten new large fires were reported, seven in the Southern Area and three in the Eastern Area. Five large fires were contained, two in the Southern Area and three in the Eastern Area. Very high to extreme fire indices were reported in California, Nebraska and South Dakota.

**SOUTHERN AREA INCIDENTS/LARGE FIRES:**

NORTH CENTRAL TEXAS IA, Texas Forest Service. A transfer of command from a Type 1 Incident Management Team (Custer) to a Florida State Type 2 Incident Management Team (Holman) will occur today. A Unified Command, consisting of the Type 2 Team and a Texas State Type 2 Incident Commander (Hannemann) is in place in Granbury, TX, and is assisting local jurisdictions in managing existing fires and initial attack within the 220,000 square mile West Zone fire management response area. The Caddo, Old Granbury Road, 4106 and Old Cemetary fires are within the management response area and are being managed by the Unified Command. Seven new fires were reported. Figures in the table represent cumulative fire activity to date for the response area.

CADDO, Texas Forest Service. This fire is two miles north of Caddo, TX in grass, oak and cedar. Flare-ups were reported within the interior of the fire.

OLD GRANBURY, Texas Forest Service. This fire is 20 miles southwest of Fort Worth, TX in grass, timber understory and hardwood litter. Wind driven grass fire with short range spotting and intermittent torching was observed.

4106, Texas Forest Service. This fire is three miles east of Greenville, TX in grass, timber understory and hardwood litter. Wind driven fire with short range spotting and torching was reported.

OLD CEMETARY, Texas Forest Service. This fire is near Sonora, TX in grass, timber understory and hardwood litter. Wind driven grass fire with short range spotting and torching was observed. Rocky, rough terrain and high winds are concerns.

EAST TEXAS IA, Texas Forest Service. A Texas State Type 2 Incident Management Team (Rose) is assigned to assist local dispatch zones in managing existing fires and initial attack in east Texas. Strong runs through dry pine plantation understory and rapid rates of spread in open pastures were observed. Figures in the table represent cumulative fire activity to date for the response area.

EASTERN OKLAHOMA IA, Oklahoma State. An Oklahoma State Type 2 Incident Management Team (Smith) is assigned in Shawnee, OK. The Team is assisting local, federal and state jurisdictions in managing existing fires and initial attack in Oklahoma. Costs represent cumulative fire activity to date for the response area.

RYAN, Oklahoma Division of Forestry. This fire is near Ryan, OK in grass. Several new starts occurred in the area. Strong, erratic winds in the wildland-urban interface are a concern.

HONEY HILL, Oklahoma Division of Forestry. This fire started on private land eight miles southeast of Stilwell, OK in timber and leaf litter. Short range spotting and long runs along ridges were observed.

RATLIFF2, Oklahoma Division of Forestry. This fire is near Ratliff City, OK in grass. Several new starts occurred in the area. Extreme fire behavior and long range spotting were observed. Strong, erratic winds are hampering containment efforts.

FREESTONE, Texas Forest Service. This fire started on private land seven miles northeast of Fairfield, TX in grass and hardwood litter. Torching in hardwood forest along with medium range spotting was observed.

MASON, Okmulgee Field Office, Bureau of Indian Affairs. This fire is two miles south of Mason, OK in grass and leaf litter. No new information was reported. This will be the last report unless new information is received.

MOS – Missouri Department of Conservation

## OUTLOOK:

**Fire Weather Watches:** In Texas for strong winds and low relative humidity. Central Florida Panhandle has a watch for marginally long durations of relative humidity below 35%.

**Weather Discussion:** A low pressure system over New Mexico will bring gusty winds and low humidity to eastern New Mexico and portions of Texas, Oklahoma and Missouri. Some areas in Florida will continue to see low humidity as high pressure continues over the state.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<b>Southern Area</b> Texas & Oklahoma: mostly sunny.	Middle 60s to middle 70s.	9 to 25% inland to as much as 45 percent along the coast near Houston.	South to southwest 15 to 25 mph occasionally gusting to 35 mph.
<b>Southern California</b> Partly cloudy.	40 to 55 mountains. 60 to 70 valleys. 50 to 60 upper deserts. 60 to 70 lower deserts.	30 to 50%.	Northwest to northeast 15 to 25 mph.
